Molly, below is the description for the agenda of the machine that I am going to purchase:

Purchase a 2022 caterpillar, model 303.5 mini excavator with a tilt coupler, 2 buckets, and a power hammer attachment. To be purchased in the FY 2023 budget. In order to lock in the pricing as well as a lead time of 3-4 months I would like to order the machine as soon as possible.

This will replace the current 2004 Takeuchi mini excavator that we currently have.

In order to lock in the pricing as well as a lead time of 3-4 months I would like to order the machine as soon as possible.

I will get the the formal paperwork as soon as I can. Let me know if you need any additional info.

Thanks

Brett J. Warner
Public Works Director

Molly, below is the description for the agenda of the machine that I am going to purchase:

Purchase a 2022 Caterpillar mini excavator, model #303.5 from Alban Caterpillar in Felton Delaware for the purchase price of \$82,662.83. The machine will include a tilt coupler, 2 buckets, and a power hammer attachment.

This unit has been included in the FY 2023 budget.

In order to lock in the pricing as well as plan for a lead time of approximated 3-4 months I would like to order the machine as soon as possible.

This machine will replace the current 2004 Takeuchi mini excavator that we currently have.
